CPA Funding Request

from East Forest Park Civic Association

There is an influx of people moving forward in **Springfield!** Today's homebuyers and city residents are seeking amenities comparable to many other neighborhoods in cities throughout the United States.

We are proposing two revitalization projects that we hope will appeal to visitors and prospective home buyers as they may take up residence in East Forest Park!

We advocate to bring an image of a relevant community to fruition by first requesting:

1. Gateway Signs to welcome prospective residents and other citizens of Springfield which we feel meets this Criteria of the CPA Act:
"Preserve and enhance the essential character of Springfield neighborhoods."

Therefore, we seek funding for **2 Gateway Signs** for our neighborhood.

One for the triangular grass area adjoining the General Edward's Bridge at Roosevelt Avenue and Island Pond Road.

And the other at the intersection of Plumtree Road and Bradley Road.

We are requesting SIGNS SIMILAR TO THOSE IN OTHER NEIGHBORHOODS.

Additionally, recognizing the environmental beauty of a natural resource in our community that enhances and invites outdoor family recreational activity which should be made the most of.

2. Therefore we seek funding for a Kayak/Canoe Boat Launch at the shoreline of T. J. Sullivan Park on Lake Massasoit along South Branch Parkway which we feel meets the Criteria of the CPA Act: “Creating and enhancing opportunities for park land.”

The EFPCA Board of Directors whole heartily submits these two projects for your consideration. We feel that they represent our renewed enthusiasm for Post Pandemic Life and that these will be exciting and relevant for new residents and all citizens throughout Springfield !

Respectively submitted,

Frank Ryan, Corresponding Secretary

2022 CPA BUDGET REQUEST
From East Forest Park Civic Association

March 25, 2022

1. Two Neighborhood Gateway Signs

We have this cost quote for 2 Neighborhood Gateway Signs specifying that they be comparable to those previously installed in other Springfield neighborhoods.
